

A-100 PRO-SALT

A-100 PRO-SALT is a conducting salt which is used especially for the electrophoretic coating process Antitarnish-A-100 PRO-KIT, a process for the passivation of precious metal surfaces, in particular silver and low carat gold surfaces.

Make-up & Dosage

Add 2.5 - 5.0 grams of A-100 PRO-SALT to 1 liter of the ready-for-use Antitarnish-A-100 solution when applying the electrophoretic coating process. Further information can be obtained at product information Antitarnish-A-100 PRO-KIT or at www.antitarnish.info.

Delivery Form & Storage

A-100 PRO-SALT is delivered as a dry salt in following package sizes:

- 100 g item-no.: 6002000
- 500 g item-no.: 6002500
- 1 kg item-no.: 6002001
- 5 kg item-no.: 6002005
- 10 kg item-no.: 6002010

Store well closed to keep it dry.
