

Beakerglass Anodes

MMO-Anode Kit For Small-Sized
Antitarnish-A-100 PRO-KIT Processes

MMO-beakerglass anodes are generally used in small-sized plating shops and for the application of Antitarnish-A-100 PRO-KIT processes.

The anodes are made of

- mixed metal oxide (MMO) coated titanium mesh
- mesh type A
- with a standard thickness of 12.5 g Ir/sqm

Characteristics

- Simple set-up and easy handling
- Perfect anode construction and anode surface position
- Easy wiring
- Perfect even plating results
- Long lifetime
- Replacable anode segments – holders can be used for long time

The MMO-beakerglass anodes are available and supplied including the suitable beaker glasses for following beaker sizes / volumes:

- 1.0 L - Item number: 6003007
- 2.0 L - Item number: 6003008
- 3.0 L - Item number: 6003009
- 5.0 L - Item number: 6003010

Further customized dimensions, plating thicknesses and mesh types on request.
